Left Stack + Right Stack Side by side butt together (with thicker magnet strips on moving rails in center)

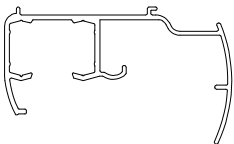

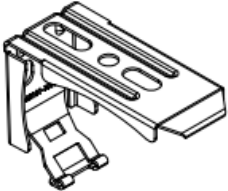

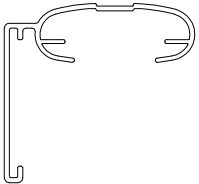

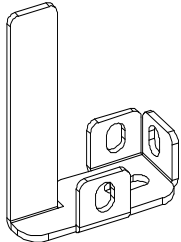

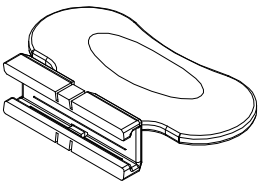

Notes: When customer needs two separate Vertical Honeycomb shades to cover a very large window opening, the side by side option is offered to meet this request.

But it must be left stack + right stack. And the left stack vertical honeycomb shade should be installed on left and the right stack one is installed on right side.

Thicker magnet strips will be pasted to the 2 moving rails in center to avoid any light gap.
